

## Garmin GTX 345 Bluetooth Pairing:

1. Press [FUNC] until "SYS" chapter is displayed.
2. Press arrow keys (8 & 9) until "BLUETOOTH" page is displayed.
3. Transponder is in pairing mode while this page is displayed. In your iPad's Settings app, select "Bluetooth" and the transponder should appear as a new device you can pair with.
4. Confirmation prompts will appear on both the transponder and your iPad. Confirm both.

### 3.4 System (SYS)

#### 3 - DISPLAY FUNCTION

BACKLIGHT 50  
OFFSET 0

**BACKLIGHT** – This page displays the current backlight level and backlight level offset. The backlight level offset is via the **CRSR** and **8 ▲** and **9 ▼** keys.

CONTRAST 65  
OFFSET 15

**CONTRAST** – This page displays the current contrast level and contrast level offset. The contrast level offset is via the **CRSR** and **8 ▲** and **9 ▼** keys.

#### NOTE

*Messages are not high priority. Their purpose is to provide additional information on abnormal system behavior. They do not require immediate pilot action. Any transponder failure will immediately display an alert with no pilot action necessary to view the alert. For troubleshooting failure messages, refer to section 7.*

MESSAGES 1

**MESSAGES** – This page displays the number of active system messages. Viewing active system messages is via the **CRSR** key selection.

BLUETOOTH ON

**BLUETOOTH (GTX 345)** – This page displays the status of the GTX 345 Bluetooth function. This page will not display when the GTX 345 connects to a GX000 or GTN over HSDB. The Bluetooth function is automatically placed into pairing mode when this page is displayed. Pairing must be initiated by the PED and then confirmed on the GTX 345. The last 13 paired PEDs are saved. At system power on, the GTX 345 automatically connects to any available and previously saved paired PEDs. PEDs that are currently connected and paired are viewed/deleted via the **CRSR** and **8 ▲** and **9 ▼** keys. For instructions on Bluetooth pairing refer to section 3.4.1. For information on Connex Bluetooth features, refer to section 6.

GPS STATUS 3D DIFF

**GPS STATUS** – This page displays the status of all configured GPS sources. The GPS position fix details are viewed via **CRSR** key selection.
